

KVR Fat Tire Bike Trails

"Fat Tire" bikes are allowed on a portion of the Kickapoo Valley Reserve (KVR). "Fat Tire" bikes are non-motorized, pedal bikes with tires of 3.7 to 5 inches wide and 10 psi or lower. The area open to the Fat Tire bikes for winter riding is located on the east side of the Reserve (see above). **Trail users must have either a current Annual or Daily KVR Visitor pass.** Fat Tire bikes must stay on designated trails or adjacent public roads.

The trails will be posted open to "Fat Tire" bikes in the winter, but are subject to closure due to adverse weather conditions. The closures will be posted through signage at the Cut Off Trail at the east end of the Rockton Bridge and on Highway 131 at the Big Valley Trail. Closures will also be posted on our website, Facebook page, and by calling the KVR Office (608) 625-2960: Monday - Friday 8 am - 4:30 pm. Hiking and snowshoeing are also allowed on this trail section. The "Fat Tire" bike season is January 1 - March 15 or until conditions warrant closure.

All of the following criteria must be in place for Fat Tire trails to remain open:

- Frozen ground
- Temperature of 25 degrees F or colder

KVR staff will monitor trail impacts and ridership to help the Kickapoo Reserve Management Board set long term policies for "Fat Tire" bike use.

QR Code - Online Payment Option for Annual or Day Pass. Annual passes will be mailed to you. Valid January 1 - December 31st current calendar year.
